

High-frequency hand-held poker vibrator

The Multivib Vibrator produces a more flexible and economic solution. The interchangeable head produces the highest possible amplitude. Energy is transferred from the compactly designed motor via the flexible shaft made out of high-quality carbon steel wire. The outer casing is made of abrasive neoprene rubber that gives both flexibility and resistance to wear.

The Multivib design can take both standard shafts as well as a new rotashaft, which makes it possible to position the motor on the ground and twist the shaft into many working positions, making it particularly useful when working on first floor castings and repair jobs.

The Multivib feature offers a lighter weight motor without losing any power and is mounted directly into the carbon casing.

FEATURES AND BENEFITS

- On-site vibration of concrete for foundations, walls, columns, and slab work. In-plant vibration of concrete during the production of pipes, slabs, beams, double T's, columns, and walls.
- Powerful, double-insulated motor.
- Interchangeable heads with double bearings.
- Integrated filter.
- Easy to change carbon brush kit-no tool needed.
- Rotashaft connections offer ergonomics and comfort in many working positions.

Multipac: complete & mounted = only in Ø 36 mm (flexible motor 3 m Ø 36 mm)

Multivib/standard and rotashaft connections
