

High quality rammers

The exceptional features of the PACLITE four-stroke CRX rammers are their compact design, low weight and high efficiency. The high and powerful percussion rate and their fast speed of movement provides excellent results.

Honda GXR120 & GX100 4-stroke gasoline engines with diaphragm carburettor, provide greatest performance.

A unique three stage air filtration system allows a virtually dust-free motor for longer service life.

The rammer foot is manufactured by hand using heat laminated wood and steel to provide flexibility and endurance on any type of soil.

FEATURES AND BENEFITS

- Exceptional smoothness and comfort while in operation.
- Engine Protection system (EPS).
- Triple air filtration system with cyclone prefilter: high filter capacity thanks to premium quality.
- Easy access to servicing points.
- Automatic oil level.
- Low vibrating handle.
- Protective cover with tachymeter that measures speed and duration of work.
- Strong lifting eye.
- Pull wheels mounted on frame for easy loading.
- Engine shut-off integrated in the throttle.
- Narrow frame 380 mm.
- Bellow of German fabrication.
- Engines Honda GXR120 or GX100.

Anti Vibration technology system and comfort
Patent Pending
