

LMK GA

MINI CRANE WITH ARTICULATED JIB FOR BRICKLAYING ON CRAMPED CONSTRUCTION SITES

- Especially for the development of vacant lots and for construction sites in inner cities
- Working in very confined spaces possible
- 5 joint elements
- Boom can be extended to a full 5m
- 400kg load capacity over the entire radius
- Massively mounted connection points of the articulated arm ensure ease of movement and durability
- Traction drive for easy work
- Radio control as standard
- Large slewing ring
- Easy assembly and disassembly thanks to the electro-hydraulic pump
- The chain hoist can be dismantled quickly
- Easy to maintain due to easy accessibility
- Compact dimensions

TECHNICAL DATA	LMK GA
lifting capacity	400 kg
hook height	5000 mm
ballast	4 pieces à 365 kg
wheelbase	2130 mm / 2130 mm
turning radius	360°
lifting speed	2.0 / 8.0 m/min
assembly and dismantling	electro hydraulic
telescopic tower	yes
traction drive	yes
voltage	400 V
transport size (L/W/H)	2400/2400/2350 mm
weight with ballast	2780 kg
weight without ballast	1310 kg

Transport position
